- Sturdy Powder Coated Bracket
- Enclosed Bracket for Protection From Harsher Environmental Conditions
- Flow rate 5-7 GPM

Blue1's TD10 is a reliable, workhorse design which provides the complete out of the box experience for the drum and tote user. Designed to provide the end-user with a complete closed system DEF dispensing experience, the TD10 is a simple and cost effective self-priming DEF pump solution. Take it out of the box and plug it in, connect it to the drum or tote and you are ready for DEF dispensing.

Options

10 or 20 ft. hose
